

FASET Bulletin No. 7 (1st May 2012)

Repairs to a Knotted Safety Net

Damaged Knotted Safety Nets can be repaired to enable further use. The following FASET guidance should be followed.

Permanent Repair Minimum Standard:

1. A Knotted Safety Net must not be repaired using a Knotless net patch.
2. The material (repair twine) used in a repair shall be new material and shall comply with BSEN1263-1.
3. The repair twine shall be of the same type and thickness as the original net and approved by the Safety Net Manufacturer for a safety net repair
4. **CABLE TIES MUST NOT BE USED TO CONNECT THE REPAIR TWINE.**

Permanent Single Strand Repair:

The repair twine shall be of the same type and thickness as the original net and approved by a Safety Net Manufacturer for Safety Nets.

NB: The repair twine **does not** need to be the same colour as the Safety Net being repaired.
